Market Resolve Sponsors 2008 Fixed Income & Derivatives Operations Conference

New York, NY – Market Resolve, LLC, a full-service solutions provider for the financial services industry, took on the role of a major sponsor for the 2008 Fixed Income & Derivatives Operations Conference held in Miami, Florida on Oct 1st –3rd.

Over 100 securities and bond market executives assembled for the annual event, produced by the Securities Industry & Financial Markets Association (SIFMA.) SIFMA represents the financial services industry, which powers the global economy, and is the single powerful voice for strengthening markets and supporting investors -- the world over.

The conference provided Market Resolve the opportunity to discuss critical challenges currently facing financial organizations and the approaches that companies can take to help them successfully maneuver those challenges.

According to Georgine Lacey, Partner and Managing Director of Market Resolve, with today's volatile economy, it is more important than ever that financial services firms get back to basics and take the appropriate steps to review their current operations from an operational and process risk perspective.

“The recent market instability, as well as the increase in financial companies being integrated into larger firms, has prompted an even greater need to establish a sense of ‘lock down’ on current processes,” said Lacey. “Firms should take advantage of this time to reassess so that, moving forward, their operations are utilizing the most secure, risk avoidant procedures and processes.”

About Market Resolve - Market Resolve is a New York based management consulting and technology firm providing operational expertise in the areas of control, hedge fund start up, documentation and centralization, regulatory/compliance, mutual funds reconciliation as well as providing flexible innovative technology to middle and back offices of financial service firms. www.MarketResolve.com
